Welcome to the team. We are working on a project called Edge Park Transformation. The end client is Cardinal Health, headquartered in Dublin Ohio but this project is being carried out from Twinsburg Ohio in the vicinity of Cleveland, Ohio.

Here are few important details -

- Please start working on Cardinal Health engagement from 03/18/2019. We will help you get AWS workspace set up to access Cardinal Health network. I will set up a kick-off meeting on Friday.
- Chris (CCed) will help you with logistics and onboarding formalities.
- Please plan to be onsite **"1909 Summit Commerce Park Twinsburg OH 44087"** starting week of 03/18/2019 from Monday-Thursday.
- You will have to take a visitor's badge to enter the building. Your Cardinal Health reporting manager is Willis Miller and managing director is Priya Lahoti.
- You can make your travel arrangements using WBSE code **NXT - CARES Phase 2 - Integration (BDYX8001)**. **Please copy me as reviewer in your myTE.**

- If flying-in, nearest airport will be Cleveland airport. Most of the team members stays in AC Hotel by Marriott Cleveland Beachwood, Springhill Suites. If staying at AC Hotel, enter corporate code **Q02** to get \$145 negotiated project rate.
- Please find attached a presentation providing information about the client. **It's a draft version, work-in-progress** but can provide some useful information.
- My phone number is +1-614-822-9213 and please check with Chris for his phone number as well.

Please find below some reference material to go over.

- <https://spring.io/guides/gs/spring-boot/>
- Attached presentation can give you an idea of what we are trying to implement here in Cardinal Health
- You can also try a video tutorial on <https://www.udemy.com/> Microservices with Spring Cloud. It's worth 10\$ which you can charge to the account.
- Once you have your Cardinal Health Credentials set up, these links will be useful
 - Jira/Confluence Access -Follow steps on confluence <https://confluence.cares.cardinalhealth.net:8443/pages/viewpage.action?pageId=7864532>
 - AWS Workstation access - Follow steps on confluence <https://confluence.cares.cardinalhealth.net:8443/display/AI/Developer+Workstation+-+Amazon+Workspace>
 - PCF Access - Access to PCF is a little complicated. It is not currently integrated with Active Directory. You need to attempt to log in to the portal (<https://login.system.cf.np.cahcloud.net/login>) with your enterprise id, which of course will fail. But this does create a shadow account in PCF, which can then be enabled.
 - New Relic Access -It is managed through AD/Service Now. The procedure is here: <https://confluence.cares.cardinalhealth.net:8443/display/AI/New+Relic>

- Splunk Access -It is managed through AD/Service Now. The procedure is here:
<https://confluence.cares.cardinalhealth.net:8443/display/AI/Splunk+Indexes+and+Active+Directory+Groups>
- Team forge Access - Follow these steps <https://confluence.cares.cardinalhealth.net:8443/display/AI/Requesting+Team+Forge+Access>

Regards

Vaibhav Datta
