ADETUNJI ODUYELA

TECHNOLOGY ARCHITECTURE DELIVERY ASSOCIATE MANAGER

Background

I have over 12+ years experience designing modern web based architecture, containerized applications and backend systems for businesses and leading small teams to implement these systems all the way through testing, QA and eventual delivery to the client.

I have worked in Agile and Scrum teams as a full stack developer using various technologies like Angular 1.x & 2 & 4, JavaScript, NodeJS, Java, Spring Boot, MongoDB, among others.

I specialize in Full-stack Application Design and Development (Tech Architecture and Delivery) of Frontend services (Angular and React) and Backend services (Java, Go, Spring Boot and Spring Cloud) here at Accenture and work as the Technical Architect/Product Manager for the Accenture Open Web Platform (AOWP) where I lead the architecture design and software development of our modern web-based applications and systems.

Education

- Masters in Control Systems, Imperial College London.
- PhD. Mech & Aerospace Engineering, Univ. of Alabama, Huntsville.
- AWS Certified Solutions Architect Associate Certified.
- Architect & Product Owner, Accenture Open Web Platform.

Select Experiences

Communications & Media Technology

- *Digital Technical Architect Manager, AT&T Sales Express Project* Worked on designing and implementing the scalable microservices architecture on the CDP Kubernetes platform at AT&T consisting of Angular 4 SPAs, Spring Boot APIs and MongoDB Services, monitoring solutions with Prometheus, Grafana, Kibana, Elasticsearch, MongoDB and Oracle. Designed, developed and demonstrated the use of several technologies and platform in solving architectural and implementation issues the project faced with Proof of Concept applications deployed on the Kubernetes infrastructure.
- *Technical Lead, Accenture Comcast Cloud-Native Migration Project* Worked as a technical lead helping guide the development of new Cloud native applications to resolve migration issues between the onshore client team and the offshore implementation team for this project. Helped in grooming junior developers on the offshore team in coding activities during meetings and one-on-one occasions.

Banking

- *Frontend Applications development lead, BBVA Compass.* Managed a small team through solution design and development of five AngularJS Single Page Applications (SPA) for the bank's new onboarding systems. These applications replaced their existing monolithic Java/JSP based solution with a set of smaller, scalable microservices.

Healthcare

- *Law Manager App Design and Development Consultant, CIGNA.* Designed and development the Law Manager application using as an Angular SPA, NodeJS API service interacting with a 3rd party IBM OpenPages solution. The applications replaced their existing manual process interacting with the IBM OpenPages solution.

Accenture Products and Platforms

- *Lead, Products and Platform Engineer, Accenture Products & Platforms (APP) Product Engineering Services.* Worked as a development engineer on the initial application development effort helping to build some of the platform components like the Customer Configuration and Service Discovery services using Spring Boot and Spring Cloud.

Accenture Open Web Platform (AOWP)

- *Arch and Project Manager* for the Accenture Open Web Platform group. I am responsible for the redesign and development of the AOWP/AOWT Accenture website and also the set of product assets for internal teams. Led design, development and implementation of the new Technology Architecture Workshop application.

Expertise

Functional/Technical

- Delivery and Implementation Experience
- Modern Web and Microservices
- Solution & Applications Architecture Design
- Applications Migration
- Cloud-Native, OSS Solutions
- Release Management, Agile, DevOps

Industry

- Banking
- Healthcare
- Education
- Retail and Consumer
- Communications, Media & Technology

Technical

- NodeJS, Java, Go, Spring Boot, Spring Cloud, HTML5, CSS, JavaScript, TypeScript, Angular, CSS3, Kafka.
- AWS Services including DynamoDB, MongoDB, S3, SQL Server.
- DevOps, CI/CD, Jenkins, Docker, Kubernetes.
